Student Feedback

Happy with single tooth isolation.
Terrible work trying to isolate multiple teeth, keep getting tears while flossing.

Assessor Feedback

Final task not assessed but good time management today, being it was only the first session on dental dam. Aaron came into class well prepared and understood each step.

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	NA	NA	Yes
Chosen clamp fits securely around tooth	NA	NA	No
Clamp correctly secured with floss, floss is secured and contained	NA	NA	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	NA	NA	Yes
Accessory retention appropriately placed (if applicable)	NA	NA	Yes
Dam secured to frame, frame correctly oriented	NA	NA	Yes
Appropriate number of teeth isolated	NA	NA	Yes
Dam flossed interproximally, including distal to the clamp	NA	NA	No
Dam inverted around all teeth	NA	NA	No
No large tears	NA	NA	Yes

Dental Dam Isolation (DDS) Score: (Cutoff: 0.81)

Pass:

Student Feedback

Overall was smooth. When placing fissure seal on the buccal fissure of 37, difficulty controlling the amount being put on, had to remove excess with microbrush.
Checked margin with explorer, no significant tactile feedback.
Dr Vicky Thai commented potentially needing more sealant on the lingual part of occlusal, but overall happy for first fissure sealant.

Assessor Feedback

Good placement

Clinical Incident

Took one glove off to handle workbook but held onto dirty gloves with other hand and didnt ABHR prior to touching workbook

Student Feedback

Initial access went towards periphery of cavity, could be more directly above the occlusal shadowing.
Had trouble initially with smoothing cavo surface margins, therefore a lot of back and forth between high speed and slow speed handpieces.
Hence, preparation is wider than necessary, but in the end happy with the cavosurface margins.

Proceeding to restoration,
Had no issues applying etch, primer and bond, followed by light cure.
Restored in 2 increments, but initially under filled, therefore needing a 3rd increment to fix cuspal slope.
Also applied fissure sealant on DL cuspal tip, and unintentionally removed some sound tooth while trying to polish it away.
No issues finishing and polishing restoration and overall not perfect, but happy for first restoration

Assessor Feedback

Cavity prep not smooth internally but managed to correct. Cavity larger than required but not detrimental to tooth

Tooth restored well, assistance required with contouring of tooth but managed to self correct
