**Student Feedback**

I found it challenging at first to know how much to stretch the dental dam to secure all teeth within it. I may have overstretched it somewhat. I needed some help getting the floss around the 44. I realize now I was putting the petroleum jelly on the wrong side of the dental dam. I found that by putting the dental dam on first it is easier to ensure the patient is not choked.

**Assessor Feedback**

Discussed dam inversion. Good effort.
