Student Feedback

It is a great learning opportunity. In particular, I learned that while I was performing dental dam isolation, I must be constantly aware of the feelings of my patient.

Student Feedback

I learned to understand that high speed burs can be very sharp and therefore I need to careful when I am creating my initial access. The size of the access needs to be as small as possible while still allows the slow speed round bur to reach the caries.

Assessor Feedback

Wear loupes as part of donning PPE. Operator chair too low. Sealant placed too thick. Did most of cavity prep with high speed. Cavity outline should be done without introducing depth. Gross overextension, DEJ caries lingual wall, rough internal.
