Student Feedback

Today I did the first two tasks, but ran out of time for the last task. I found it difficult to get all the teeth in the dental dam for task 3, and the dame was bunching up a few times. But by the end of the session I was feeling a lot better about dental dams, and understood them a lot more.

Operator chair height too high. Sealant needs to be placed on dry tooth surface. Review etch time for sealants. Excess pooling of sealant, too thick. Can increase pace. Overextended prep, unsupported enamel around most of outline. DEJ caries buccal wall.
