Student Feedback

Using the plastic frame, it would be easier and more secure when placed under the dental dam. The holes on the dental dam were a bit too big for the incisors, so the dental dam was not tightly surrounding the teeth. I should adjust and use a smaller hole when using the dental dam punch in the future.

Assessor Feedback

Small gap around one lower incisor. Punched hole ? too large?

The cavity outline was a bit large because the initial access was off. Also, the DEJ should be checked to see if it is clean.

Assessor Feedback

Overextended distoligually, Dej caries recognised and removed correctly.
