Student Feedback

I forgot to change the size of the hole during puncture of the dental dam and I think this augmented the shape of the dam around the anterior teeth, leaving too much space when I was trying to invert. Posterior teeth inversion was ok but anterior teeth was harder because the gap was too big. Otherwise, clamp application was quite comfortable and easy to secure, same with wedjet and floss ligature, I tore my first dam attempt but getting more practice with cutting holes and securing the clamp was useful.

Assessor Feedback

Good self reflecting, was able to ask for help when needed.
Working on inversion of dam

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 1.0 (Cutoff: 0.81)

Pass: True

havent finished restoration. sealant application went well and so did cavity prep. i had to drill a lot deeper than i anticipated so i spent quite a lot of time being conservative, but felt quite comfortable switching between handpieces to create a good prep. buccolingual length of the prep was a bit big, but mesiodistal was good. with the restoration, i got all the way up to the polishing, but found that there were small circular imprints on the restoration. im not sure if these are from the ball bearing when i was applying the resin, or the tips of the polishing burs and i didnt cure the resin for long enough to set it properly. otherwise everything was pretty good

Assessor Feedback

DEJ caries self identified.
Restoration to assess next time.

felt quite worried that i was applying too much sealant because i could hardly see where it was before curing it but ended up doing a good job. importantly, i neglected the groove on the buccal aspect of the tooth that connects to the fissure system, which can be quite plaque retentive, so i'm going to focus on making sure i check non-occlusal surfaces carefully in the future. otherwise all went well and felt smooth

Assessor Feedback

Well placed.
