For fissure seal, remember only need to apply small amount of conseal in the following practice.  
For preparation, the proximal wall is a bit diagonal, need to make it more vertical.  
For restoration, did a good job generally, the margin at the distal lingual cusp has a minor catch, requires a bit more polish with the brownie

*Assessor Feedback*

Some material on cuspal inclines  
Further refinement required of lingually wall as was flared out  
Resin restoration-further polishing required for lingual marginal excess
