**Student Feedback**

Fissure Sealant:  
I feel like I was quite slow at the task, and it did turn out neat enough, but there was some debris left in my fissure sealant that I shouldve watched out for.  
Cavity preparation:  
I think my gap was slightly too wide because I kept trying to make the walls of the cavity smoother, but ended up making the hole larger than necessary. It was difficult for me to make the cavity surfaces smooth, and I kept creating overhanging enamel that I had to fix up.

**Assessor Feedback**

Sealant redone on tooth 37 but had pumice debris entombed within sealant.  
Cavity prep larger than required and rough on the cavity floor  
Difficulty holding handpiece and instruments with incorrect grip

**Clinical Incident**

Wrong tooth FS, 47 sealed instead

**assessor\_positioning\_MC1**

Yes

**assessor\_positioning\_MC2**

Yes
