Reflect on the student's performance across the month - what are some strengths and areas you have identified for improvement.

Staff	Comments
Chen Chen	Clinical skills lacking, and is not always aware of own limitations, and cannot identify what needs improvement. Knows fundamental prosthodontic concepts in theory but often has trouble applying it in practice. Generally not on par, in knowledge or execution, with what is expected at this point in residency. Requires strict supervision at all stages of planning and carrying out treatment. Strengths are that he is good at asking for direction, takes on feedback well and modifies actions based on feedback. Seems to be serious about wanting to improve.
Jaafar Abduo	Omar is improving from last year. Still struggles with basic prosthodontic treatment such as composite veneer, post resin pattern (stuck in the root and had to be drilled away), and crown preparation refinement.
John Pearson	Happily there seems to be an improvement in quality of operative procedures and tidyness of laboratory work. Would like to see integration of more time taken with procedures and explanation of these procedures . Seems to take criticism of work to hand.

Has a clinical incident occurred during this month while you were supervising this student?
