Student Feedback

It was difficult to invert the dam for all the teeth. It led to me making holes in my dam.

Assessor Feedback

Position of frame too low, causing oral cavity to be exposed. Good working pace. Patient positioning too low. Be mindful of patient safety, ie. dam material in patient's throat. Remember to work with good illumination.

Drilling into the central pit did not lead to cavity exposed. Had to drill further buccally led to a bigger cavity prep (too much enamel wasted).

Assessor Feedback
