Student Feedback

Took multiple trials to fit the teeth through the holes without tearing the dam. Need to work on dam placement to ensure that the upper arch is fully covered. Try to minimize tearing - especially for the teeth around the clamps.

Assessor Feedback

Ensure upper lip covered- critical error

Student Feedback

Ensure that the high speed diamond polishing bits are used sufficiently before slow speed browns and greens. Ensure that the rough surfaces are all polished and try not to overdo the polish! There were some excess composite in the fissures that were removed upon review.
Good job minimizing the access for the cavity removal. Remember to remove burs from hand pieces.

Assessor Feedback

Make sure bur is inserted fully.
Use slow speed to smooth out internal walls.
Bit of excess fissure sealant otherwise well done on the polish!

Clinical Incident

High speed bur not fully inserted
