**Student Feedback**

I found this session very overwhelming at times however, I expected this prior to going in for the session. Despite me watching the procedural video and reading the manual numerous times, I found myself still overwhelmed and underprepared at times, as there were things that I didn't account for when watching the video such as posture and hand hygiene. Overall, I was not satisfied with the final product I produced, but I understand that everyone learns at their own pace and that I shouldn't be too harsh on myself. I was encouraged by seeing how I improved from the benchtop task to the final task and I was given good advice by Dr. Fam which I look forward to implementing in the next session. I aim to practice what I can at home and am hoping to see some improvement in the next session.

**Assessor Feedback**

Please complete your prep work before class starts, Ethan! Place both feet firmly on ground, not on tiptoes. Patient positioning too low. Be mindful of posture, bends over excessively sometimes.

**assessor\_positioning\_MC1**

No

**assessor\_positioning\_MC2**

No

**Student Feedback**

I need to be more careful and precise with handling my instruments and materials, as I find that I often start rushing and stressing when I am struggling to do something. I didnt end up finishing the task where I hoped to prior to the session, but i feel confident that I would be able to carry out the tasks more confidently and produce higher quality outcomes when I have to do these tasks again.

**Assessor Feedback**

Fs oversealed onto cuspal incline and void present.  
Prep overly deep

**assessor\_positioning\_MC1**

Yes

**assessor\_positioning\_MC2**

Yes

## Assessor Feedback

Large tear on 36D, be gentle with flossing and use saw tooth action when flossing interproximally. Dont forget to invert all teeth and make sure opposing arch is fully covered by dental dam.
