Student Feedback

Overall, it was a first try. I think I did well in inverting the dam. However, I counted the teeth wrong, instead of doing 37 to 44, I did 36 to 45. The clamps were not fitted at the cervical constriction. Another problem was tearing the dam while flossing. I need to make sure that the dam is fitted between the teeth before flossing to prevent tearing the dam.

Assessor Feedback

Isolated 36-45, check and count teeth carefully when clamping
Ensure clamp placed to cervical constriction

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	No	No	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	NA	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	No	No	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 0.85 (Cutoff: 0.81)

Pass: True

Student Feedback

Good first try, removed all caries and margins are smoothes. Placed too much composite into the cavity. Need to remember to dim the light when working with light curing materials.

Assessor Feedback

Slight overextension. Other than that, great job.
Pay attention less composite in increments
Curing technique-light closer to teeth

placed a bit too much sealant on the fissures but it was good overall.

Assessor Feedback

Slightly too much sealant remember to dim overhead light. Remember to use light paddle when curing

Student Feedback

Removed too much of the distal lingual cusp during finishing.

Assessor Feedback

Tear in the dental dam and floss missing from a clamp, both noticed by student before getting checked by demo.
Too much damage to cusps when finishing.
