Student Feedback

For this final exercise, I felt more confident with placing the dam onto tooth 37 and was able to get it done in one motion. The most difficult and tedious part was placing the holes over the rest of the teeth without tearing the dam. I unfortunately did make some small tears at the borders of some holes. I believe that was because I did not punch the holes accurately into the dam (they were slightly off centred), so I need to make sure I mark the holes properly with the dam securely on the template. Additionally, Dr Fam noted that I may have been too rough with the interproximal flossing - I must learn to get a feel for it and be more gentle.

An error that I made (twice) was placing the powder side of the dam towards the patient. In hindsight, that was because from the beginning I marked the dam on the wrong side while I was still preparing it on the benchtop. Next time, I will remember to make the markings on the matte side of the dam, not the shiny side.

Dr Fam noted that my posture was good, I had good time management for the tasks and I was meticulous with interproximal flossing. I hope to keep that up for future activities. In the future, I also hope to practice with different accessory retentions like floss and a separate clamp.

Assessor Feedback

Good posture. Good time management. Neat work, mindful.

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 1.0 (Cutoff: 0.81)

Pass: True

Student Feedback

I had some trouble smoothening out the walls of my cavity prep, especially the buccal and lingual surfaces. In the end the result I believe was satisfactory, but I can definitely improve. I need to remember to go vertically down with my bur into the cavity.

Assessor Feedback

Overfilled with fs onto cuspal incline.
