Thinking about the correct way to orientate the floss on the clamp was something I hadn't considered at first but found myself having trouble with once I began. I also found the markings on the dental dam hard at first but after shining the light through the dam it helped a lot.

Assessor Feedback

Great time management, worked well independently

Making my access for the cavity, I went a little too wide to ensure I had smooth edges but I should have been more conservative. Putting the filling on cured faster than I expected! I also initially put too much filling on and had to take it out. The polishing was difficult to get a handle on following the fissure and cusp pattern but after some time it got easier.

Assessor Feedback

Prep slightly overextended buccolingually.
Restoration margins slightly rough.
