Student Feedback

It took a lot of practice and attempts to make sure the dental dam wasn't breaking, this helped me get a feel for how much the dental dam can be stretched before breaking. I noticed when I was flossing the teeth my hands were getting crossed over quite a bit which made it a bit difficult sometimes, so I will focus on this hand coordination next time. I also need to use the lubricant more often and make sure I am adjusting my light to my working area. I practiced applying the dental dam directly to the clamp outside of the mouth and while the clamp was attached, I found that applying it outside of the mouth was easier as I felt I had too much going on in the mouth of the manikin so I will have to practice applying the dam to the clamp in the mouth in a tidier fashion.

Assessor Feedback

Dam had slipped off one retention point on frame.

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Student Feedback

My cavity outline was a bit bigger than the decayed area as I was unaware where to make my initial entry as I could not see the decayed spot very well

Assessor Feedback

Access a bit wide but due to initial access too far distal.
Great rounded internal walls and cavity outline smooth. Good hand control.

Student Feedback

I used too much Conseal so the fissures were a bit overlined

Assessor Feedback

A little excess with fissure sealant material - should still be able to see fissure outline. Dry the tooth to assess placement. Otherwise well done!
