Simulation

### Student Feedback

In this activity, we were required to isolate teeth 37 to 44 in the manikin head. As a dental assistant, I personally have seen dental dam application in close view, however, I was always scared that the dental dam might come off, or uncomfortable to patients. When doing the isolation, I felt like it was easier than expected, and found it easier if I attached the clamp onto the dental dam before applying to manikins. I found anchoring the frame to the dental dam but after several of practice, I found that more stretch is required to secure the frame to the dam. I learnt that distancing the holes is important to ensure proper coverage of teeth by the dam. I felt like I am more confident with applying dental dam and was generally satisfied with my progress.

### Assessor Feedback

Attempted to retrieve things from issue table with gloved hands,was intercepted

Small tears and trouble inverting dam

*assessor\_positioning\_MC1*

Yes

*assessor\_positioning\_MC2*

Yes

### Rubric Scores

Rubric	Score

Entrustment	4.0
Communication	2.0
Professionalism	2.0

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 1.0 (Cutoff: 0.81)

Pass: True

# Form 2: 03-04-2025

## Items Performed

SOP-DDS, SOR-DDS, FS-DDS

## Student Feedback

In this activity, we were placing fissure sealants and removed small carious lesions, followed by restoration and fissure sealant application. I personally found that it was relatively easy to place fissure sealants, however, it was difficult for me to identify the caries, thus made larger access than I originally intended. I learnt that pressure control with high speed handpiece is important as I made a small pit that wasnt intended. However, I enjoyed using the handpieces for the first time and it was quite interesting to actually do my first hands on cavity preparation. For next session, I will be more mindful of the pressure I exert on my handpiece to minimally cut the affected dentinal caries. Overall, I was happy with the outcome of today's session.

## Assessor Feedback

Slight excess of fs.  
Resin is 4 mm deep. A bit rough internally.  
36 resin- one small rough spot.

*assessor\_positioning\_MC1*

Yes

*assessor\_positioning\_MC2*

Yes

Evaluation for SOP-DDS: DDS1 SmOcc Prep

Marking Checklist	Student	Educator	Critical
Selective caries removal demonstrated: pulpal	Yes	Yes	Yes
Selective caries removal demonstrated: peripheral surfaces	Yes	Yes	Yes
DEJ is caries free	Yes	Yes	Yes
Cavity outline reflects extent of caries	Yes	No	Yes
Cavity depth reflects extent of caries	Yes	No	Yes
Cavosurface margins supported?	Yes	Yes	Yes
Internal surfaces smooth	Yes	No	No
Adjacent teeth/surfaces: no iatrogenic damage	Yes	Yes	Yes

DDS1 SmOcc Prep Score: 0.69 (Cutoff: 0.86)

Pass: False

Evaluation for SOR-DDS: DDS1 SmOcc Resto

Marking Checklist	Student	Educator	Critical
Composite handling: Homogenous	Yes	Yes	Yes
Surface finish smooth	Yes	Yes	No
Margins: No deficiency	Yes	Yes	Yes
Margins: No excess	Yes	No	No
Tooth morphology and contour resembles anatomy	Yes	Yes	No
Adjacent teeth/surfaces: No iatrogenic damage	Yes	No	Yes

DDS1 SmOcc Resto Score: 0.66 (Cutoff: 0.69)

Pass: False

Evaluation for FS-DDS: DDS1 FS

Marking Checklist	Student	Educator	Critical
Correct surface preparation prior to placement	Yes	Yes	NA
Neat placement in fissure system	Yes	Yes	NA

DDS1 FS Score: 0 (Cutoff: N/A)

Pass:
