Student Feedback

I found it difficult to invert the dental dam around each tooth however when utilising the flat plastic instrument and pushing into the direction of the gingiva it worked well. Next time I will make sure that the clamp is situated appropriately on the crown of the tooth to ensure the distal area of the tooth that is clamped is covered by the dental dam.

Assessor Feedback

Sound ability to self assessment and ask for relevant advice when uncertain
Overall, well placed dental dam

assessor_positioning_MC1

Yes

assessor_positioning_MC2

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 1.0 (Cutoff: 0.81)

Pass: True

Form 2: 03-04-2025

Items Performed

SOP-DDS, SOR-DDS, FS-DDS

Student Feedback

Difficulties in finding the caries and as a result over extending the access into the tooth. In future I would be more conservative and try maintain an equal depth of the access when removing caries from the tooth. Review of etching times is required for future as well.

Assessor Feedback

Review etch time for sealants. Neat placement of sealant. Cavity prep gross overextension.

Clinical Incident

Fissure sealed 36 instead of 37.
