

Feedback report: CAT 6

Your details

Student ID

Test date November 2023

Participants 335

What's in this report

This report has 4 parts:

This **introductory** section (pages 1 & 2) contains some general information about the report. It includes your details, as well as some basic information about the report and how to interpret it. Please refer to the **legend** for each of the remaining 3 parts on the next page for information on how to read and interpret your data.

Part A shows your overall performance for the target assessment as well as for any other related previous assessments where these form part of a series (e.g. cumulative achievement tests or progress tests). The overall performance scale shows your percentage score. If a **pass score** has been set for the assessment then this will also be indicated. If not then an **estimated satisfactory score* (ESS)** indicator will typically be included. An indication of your **relative performance**** is also provided. This infographic shows which quintile you were placed in (e.g. quintile 1 = 81st to 100th percentile, quintile 3 = 41st to 60th percentile, etc.)

Part B summarises your results by **domain** (all items are tagged to at least one category for each represented domain)***. An ESS indicator will be displayed for all domain categories containing 8 or more items.

Part C provides you with basic item-level feedback. The feedback for each item includes whether you answered it correctly or incorrectly, a brief **summary** of the item, a measure of the item's **difficulty** and a series of **tags** representing the domain categories that the item is linked to. If the assessment required you to indicate how certain you were about each of your responses then a **certainty indicator** will also be included.

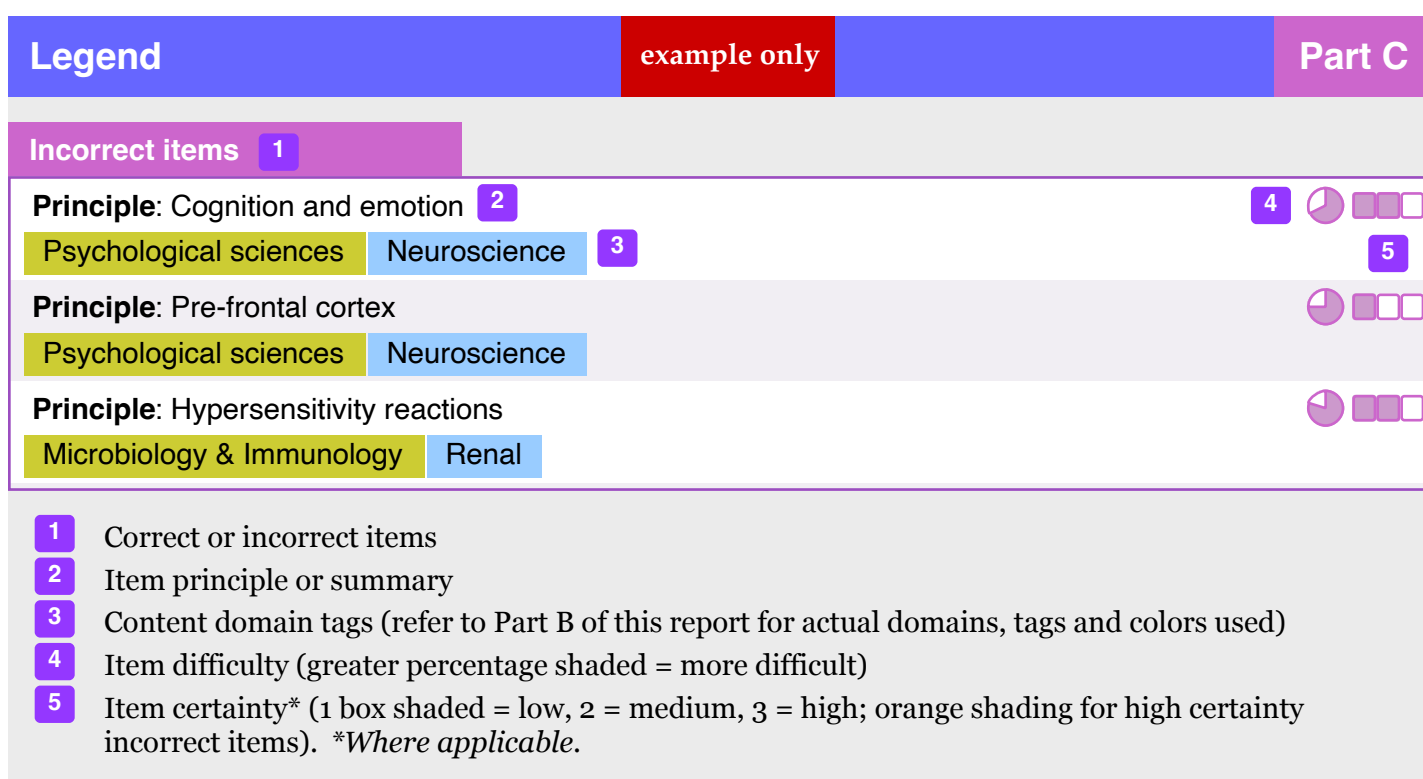

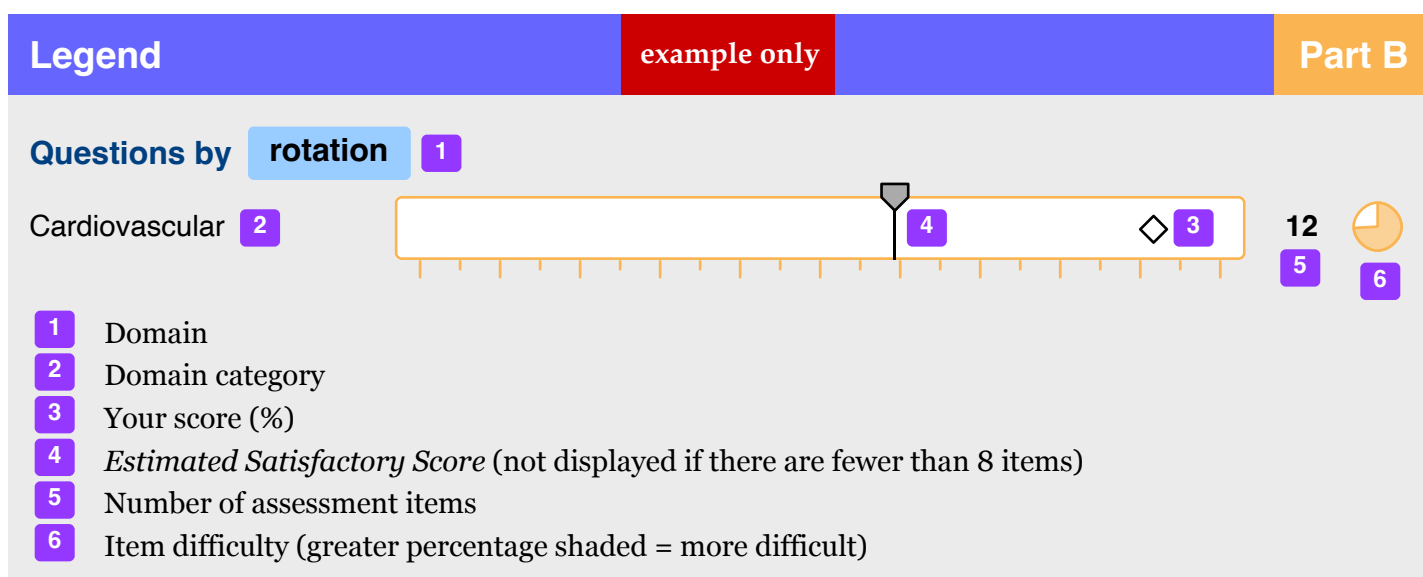

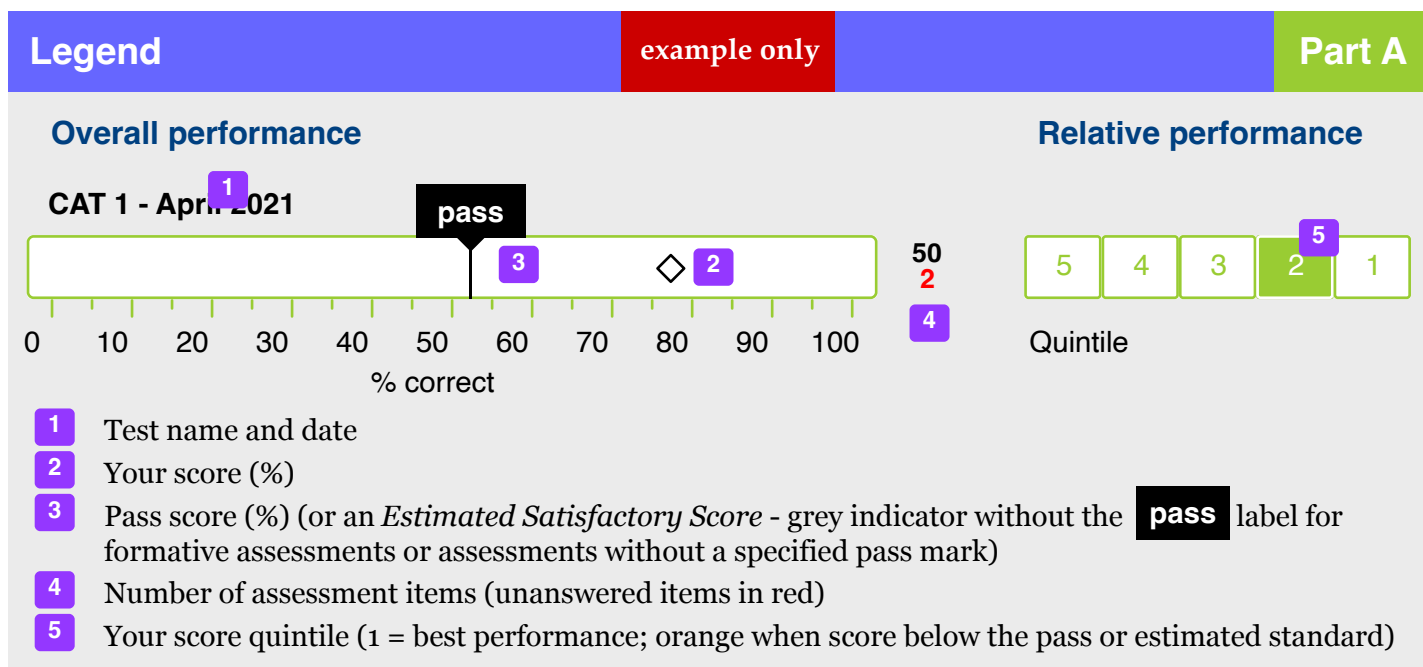

** The ESS is an estimated value based on the performance of all students on the relevant items ($0.65 \times P_{90}$). It is not equivalent to, and nor should it be interpreted as, a passing score.*

*** Relative performance and difficulty measures may not be shown for reports based on assessment sat by a small number of students (e.g. special or supplementary assessments).*

**** Individual items may apply to more than one domain category meaning that the combined number of items for all categories within a domain may exceed the total number of test questions.*

IMPORTANT!

Please note that results provided in this feedback report are provisional only and are subject to change. Assessment results are not finalised until completion of the end of semester/year Board of Examiners meetings.

Questions by physician task

Incorrect items

Summary: Older woman in emergency with shoulder and neck pain for investigation

patient assessment medicine foundation cardiovascular

Summary: Middle-aged man in emergency department with hyperkalaemia for management

patient management medicine renal management

Summary: Middle-aged man in emergency with wrist injury for diagnosis and application of biosciences

clinician scientist clinical reasoning critical care MD1 musculoskeletal & connective tissue
diagnosis application of biosciences

Summary: Adult man in general practice with back pain for investigation

patient assessment ambulatory medicine surgery musculoskeletal & connective tissue
specialities medicine surgery

Summary: Older man with skin lesion for diagnosis

clinical reasoning ambulatory skin & subcutaneous diagnosis

Summary: Young man in emergency with fever and weight loss for diagnosis

clinical reasoning medicine immunologic diagnosis

Summary: Young woman in general practice with abnormal bleeding for diagnosis

clinical reasoning medicine blood & blood forming diagnosis

Summary: Older man in emergency with speech difficulties for application of bioscience

clinician scientist MD1 nervous system MD1 medicine

Summary: Adult woman with red eyes for management

patient management specialities nervous system diagnosis

Summary: Middle-aged woman requiring local anaesthetic for assessment

patient assessment patient management surgery nervous system patient history
clinical examination

Summary: Adult man in emergency with cough and fever for management

patient management medicine respiratory system management

Summary: Older man in emergency with weakness and difficulty speaking for management

patient management medicine nervous system management

Summary: Older woman with upper abdominal pain and abnormal gastric biopsy for management

patient management clinician scientist medicine gastrointestinal application of biosciences
diagnosis

Summary: Middle-aged woman in general practice with diabetic nephropathy for management

patient management medicine endocrine & metabolic management

Summary: Young man in emergency with vomiting and urinary frequency for investigation

patient assessment patient management medicine endocrine & metabolic management
investigation

Summary: Young adult man in emergency with ankle injury for management

patient management surgery critical care musculoskeletal & connective tissue management

Incorrect items

Summary: Older man with pain and swelling of his great toe for diagnosis

clinical reasoning ambulatory musculoskeletal & connective tissue specialities

Summary: Older woman in general practice with foot ulcer for diagnosis

clinical reasoning surgery cardiovascular diagnosis

Summary: Elderly woman in emergency with hip pain for management

patient management surgery ambulatory musculoskeletal & connective tissue surgery
critical care

Summary: Adult man in general practice with inguinal lump for application of bioscience

clinician scientist MD1 surgery gastrointestinal application of biosciences

Summary: Adult man in general practice with skin lesions for diagnosis

clinical reasoning specialities skin & subcutaneous application of biosciences diagnosis

Summary: Older woman in general practice with calf pain for clinical examination

patient assessment clinician scientist surgery MD1 cardiovascular application of biosciences
clinical examination

Summary: Older woman in emergency with transient loss of consciousness for application of bioscience

clinician scientist MD1 foundation cardiovascular application of biosciences

Summary: Older woman in hospital with heart disease and diabetes for perioperative care

patient assessment surgery endocrine & metabolic investigation

Summary: Older man in emergency with epistaxis for management

patient management specialities respiratory system management

Summary: Multidisciplinary practice

collaborative practice surgery skin & subcutaneous management

Summary: Young woman in emergency with abdominal pain for management

patient management surgery gastrointestinal nervous system management

Correct items

Summary: Middle-aged man in outpatients with abdominal wall abnormalities for application of bioscience

patient assessment clinician scientist MD1 medicine gastrointestinal
application of biosciences clinical examination

Summary: Older man in general practice with dyspnoea for investigation

patient assessment medicine cardiovascular investigation

Summary: Adult woman in emergency with severe headache for investigation

patient assessment ambulatory medicine nervous system critical care medicine

Summary: Young man in emergency with chest pain and fever for diagnosis

clinical reasoning medicine respiratory system diagnosis

Summary: Older man, inpatient following myocardial infarction for assessment

clinical reasoning foundation medicine cardiovascular management

Summary: Middle-aged man in emergency with severe eye pain for diagnosis

clinical reasoning specialties nervous system diagnosis

Summary: Young woman in general practice with headaches for investigation

clinical reasoning medicine endocrine & metabolic investigation

Summary: Middle-aged woman in emergency with dizziness for diagnosis

clinical reasoning critical care medicine cardiovascular investigation

Summary: Middle-aged woman in outpatients with difficulty walking for clinical examination

patient assessment medicine nervous system clinical examination

Summary: Older man in emergency department with increasing dyspnoea for investigation

clinical reasoning medicine foundation respiratory system diagnosis

Summary: Young woman in general practice with dysuria for application of bioscience

clinical reasoning clinician scientist medicine MD1 Urinary application of biosciences
diagnosis

Summary: Older woman in community with cardiac arrest for clinical pathology

clinician scientist medicine foundation cardiovascular diagnosis application of biosciences

Summary: Middle-aged man in emergency with fever for diagnosis

clinical reasoning medicine blood & blood forming diagnosis

Summary: Adult woman with neck pain for investigation and application of bioscience

clinician scientist MD1 musculoskeletal & connective tissue investigation

Summary: Middle-aged woman in outpatients with abdominal pain for diagnosis and application of bioscience

clinical reasoning clinician scientist surgery gastrointestinal renal diagnosis
application of biosciences

Summary: Middle-aged woman in surgical ward with dyspnoea for management

patient management critical care medicine surgery respiratory system management

Summary: Young woman with bloody diarrhoea for diagnosis

clinical reasoning surgery gastrointestinal diagnosis

Correct items

Summary: Older man in emergency with altered conscious state for diagnosis

clinical reasoning surgery critical care nervous system diagnosis

Summary: Young woman with right iliac fossa pain for application of biosciences

clinical reasoning clinician scientist MD1 surgery gastrointestinal application of biosciences

Summary: Elderly woman in emergency with fall for management

patient management medicine critical care multi-system management

Summary: Young adult man in emergency with decreased urine output for diagnosis

clinical reasoning medicine renal diagnosis

Summary: Middle-aged woman with breast cancer for management

patient management surgery skin & subcutaneous management

Summary: Middle-aged man in emergency with abdominal pain for clinical examination

clinical reasoning surgery respiratory system gastrointestinal clinical examination diagnosis

Summary: Adult woman in emergency with right abdominal pain for management

patient management patient assessment surgery Urinary management investigation

Summary: Adult man with facial ulceration for application of biosciences

clinical reasoning clinician scientist ambulatory nervous system specialities MD1

Summary: Adult man in general practice with urinary frequency for diagnosis

clinical reasoning surgery male reproductive diagnosis

Summary: Adult man in hospital with acute deterioration for management

patient management critical care surgery cardiovascular management

Summary: Middle-aged woman in emergency with lower abdominal pain for diagnosis

clinical reasoning surgery gastrointestinal diagnosis

Summary: Middle-aged man in general practice with fatigue for diagnosis

clinical reasoning medicine blood & blood forming diagnosis

Summary: Middle-aged woman in general practice with dizziness and tinnitus for diagnosis

patient assessment ambulatory general practice nervous system specialities

Summary: Adolescent man in general practice with dyspnoea and wheeze for management

clinician scientist patient management medicine respiratory system management

Summary: Adult woman in general practice with shortness of breath for investigation

clinical reasoning patient assessment medicine foundation respiratory system investigation

Summary: Middle-aged woman in general practice with calf pain for diagnosis

clinical reasoning surgery cardiovascular diagnosis

Summary: Adult woman inpatient with head injury for application of bioscience

patient assessment surgery MD1 medicine endocrine & metabolic investigation
application of biosciences

Correct items

Summary: Young woman with anal fistulae for diagnosis

clinical reasoning medicine gastrointestinal diagnosis

Summary: Middle-aged man in emergency with flank pain for application of biosciences

clinical reasoning clinician scientist surgery MD1 renal Urinary application of biosciences

Summary: Older woman in emergency with fall for clinical examination

patient assessment medicine MD1 nervous system clinical examination
application of biosciences

Summary: Older man in general practice with leg swelling for clinical examination

patient assessment medicine foundation cardiovascular clinical examination

Summary: Adult man in emergency with haematemesis for application of biosciences

clinician scientist surgery gastrointestinal application of biosciences

Summary: Young man in emergency following a collapse for initial management

patient management medicine endocrine & metabolic management

Summary: Young adult woman in emergency department with collapse for diagnosis

clinical reasoning medicine critical care nervous system diagnosis

Summary: Young man in emergency with headache for investigation

clinician scientist patient assessment medicine MD1 nervous system
application of biosciences investigation

Summary: Young adult man with transient loss of consciousness for assessment

patient assessment medicine cardiovascular patient history clinical examination

Summary: Middle-aged woman undergoing spinal anaesthesia for application of bioscience

clinician scientist surgery MD1 nervous system application of biosciences

Summary: Adult woman in general practice with neck mass for investigation

patient assessment MD1 ambulatory endocrine & metabolic MD1 medicine

Summary: Middle-aged woman in general practice with knee pain for management

patient management clinician researcher ambulatory MD1
musculoskeletal & connective tissue specialities medicine MD1

Summary: Middle-aged woman inpatient with fever and tachypnoea for application of biosciences

clinician scientist MD1 respiratory system application of biosciences

Summary: Middle-aged woman with abdominal pain for diagnosis

clinical reasoning surgery gastrointestinal diagnosis investigation

Summary: Young adult woman in emergency with trauma for initial management

patient management surgery critical care cardiovascular management

Summary: Elderly woman with headache and visual loss for clinical reasoning

clinical reasoning ambulatory cardiovascular immunologic specialities

Summary: Middle-aged man inpatient with post-op hypotension for management

patient management surgery gastrointestinal management

Correct items

Summary: Middle-aged woman with thumb pain for diagnosis

clinical reasoning specialities musculoskeletal & connective tissue diagnosis

Summary: Elderly woman with fracture for assessment of activities of daily living

patient assessment aged care foundation musculoskeletal & connective tissue foundation

Summary: Adult woman with rash on both feet for diagnosis

clinical reasoning specialities skin & subcutaneous diagnosis

Summary: Older man in general practice with exertional dyspnoea for clinical examination

clinical reasoning patient assessment medicine foundation respiratory system diagnosis
clinical examination

Summary: Middle-aged man in hospital with fever for management

patient management medicine immunologic management

Summary: Elderly woman in general practice with back pain for patient history

clinical reasoning medicine surgery nervous system musculoskeletal & connective tissue
patient history

Summary: Middle-aged man in emergency with right iliac fossa pain for diagnosis

clinical reasoning surgery cardiovascular diagnosis

Summary: Elderly man in hospital with agitation for management

patient assessment patient management critical care medicine nervous system
investigation

Summary: Young adult man in emergency with knee pain for investigation

patient management patient assessment MD1 medicine surgery
musculoskeletal & connective tissue investigation

Summary: Middle-aged woman in Emergency Department with post-op chest pain for diagnosis

clinical reasoning medicine cardiovascular diagnosis

Summary: Adult man in general practice with upper abdominal pain for diagnosis

clinician scientist clinical reasoning surgery MD1 gastrointestinal diagnosis
application of biosciences
