Student Feedback

I have to work on dental dam placement so that it is further away from the nose for the next session. I felt more comfortable fitting the teeth into the dental dam and utilising floss to do so. Took me less time to complete the dental dam activity with more accuracy. Need to work on my posture so that I'm not bent down too far over the manikin.

Assessor Feedback

Be mindful of patient safety, not allowing dam material to fall down patients throat. Good pace and understanding. I think you can try to gain some independence next class and explore some things (confirm your thoughts through implementation) before asking for help. Be mindful of posture, bending over excessively.

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	No	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 0.99 (Cutoff: 0.81)

Pass: True

Student Feedback

I was able to floss between each teeth without ripping the dental dam. I utilised the hand mirror to gain visual on the lingual aspect of the mandibular central incisors and tried to push the dental dam cervically downwards; Dr Fam demonstrated a technique how to get them further down cervically so that they are inverted. I worked on this aspect after her suggestion.
