I completed the task however I was unaware I was using the wrong dental dam material. Upon realizing I could use the proper dental dam material, I only had 15 minutes to complete task 5. I had errors with task 5 but I was happy to finish this assessment.

Assessor Feedback

Small tear adjacent to 35.
Frame not square on to tooth; looks very untidy!

Student Feedback

As I was using the football shaped bur to reshape the restoration, I carved some occlusal enamel on the distobuccal cusp. Next time I will be more conservative and careful with the polishing and refining of the resin.

Assessor Feedback

Great caries removal, caries free DEJ. Fissures sealant a bit overfilled.

Cavity prep a bit wide

Careful not to damage adjacent enamel when finishing and polishing

I accidentally placed the fissure sealant on 36 rather than 37. It was a mistake as I my attention was caught between preparations for task 2 which utilized 36H for fissure sealant as well. I believe my prep was good and the steps were carried out well, I just placed a bit too much sealant.

Assessor Feedback

A bit excessive with fissure sealant material
