Ran out of time to get Task 5 assessed.

Assessor Feedback

Good time management for the first dental dam session. Well done for taking your time and still completing the first two tasks with minimal errors.

Fissure sealants were done quite well. For the small occlusal cavity prep, I began drilling more towards the lingual aspect of the tooth and didnt see any coloured dye indicating caries. The first entry was cut a little deeper than I wanted, so the cavity depth reflected more than the extent of the caries (now I know for next time to slowly create the access hole so that doesn't happen again. Dr. Phu encouraged that I open my cavity prep more towards the buccal aspect, and I did end up finding the caries. I struggled to remove all the caries at the DEJ, and I swear it was never-ending. I took my time making sure that the cavity walls were all smooth. The cavity prep was definitely on the bigger side due to my early error, but I felt very proud of it in the end. After the restoration was cured, I didnt finish polishing the occlusal surface, so the final product couldnt be assessed. Overall, I think it went quite well, and I appreciate that I took the time to complete each step and didnt rush through.

Assessor Feedback

Neat placement of fissure sealant. Good awareness of DEJ caries. Good placement of resin composite. Please continue with shaping and finishing at your next session.
