**Student Feedback**

I attempted all tasks up until isolation of 37 to 44. For the isolation of 1 tooth, I was able to complete all checklist appropriately. However, when I had to isolate more than 1 tooth, I was unable to finish in the time allocated as there were tears in between when attempting to floss interproximally so I had to restart many times when the dental dam ripped. Next time, I would like to try to be more gentle when flossing.

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	No	No	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	No	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	No	Yes
Accessory retention appropriately placed (if applicable)	No	NA	Yes
Dam secured to frame, frame correctly oriented	Yes	NA	Yes
Appropriate number of teeth isolated	No	NA	Yes
Dam flossed interproximally, including distal to the clamp	No	NA	No
Dam inverted around all teeth	No	NA	No
No large tears	NA	NA	Yes

Dental Dam Isolation (DDS) Score: 0.36 (Cutoff: 0.81)

Pass: False

### Student Feedback

For the fissure sealant procedure, I was quite happy with my progress. I used a little bit too much sealant material on the cuspal incline. Next time, I will use a little less and drag the material out more. For the small occlusal restorations, it took me awhile to reach the cavity depth as I was too timid to increase the speed of the hand piece. For the cavity outline, the lingual wall was a little flared. Otherwise, I thought the internal surfaces are smooth and there is no unsupported enamel. To correct the flared wall, I will run along the deeper surface of that side to even it out. For the small occlusion restoration, I am happy I completed it well under the guideline. However, I could improve on removing the excess greenie bits by using water and air as well as using the probe as it was external to clean all the stains.

### Assessor Feedback

Excess fissure seal on cuspal inclines

Occ prep-overextended on buccal aspect otherwise demonstration application of knowledge of cavity design principles

Occ restoration-some green stains from polishing requiring further polishing
