Student Feedback

I found it challenging but also rewarding to be able to isolate the different teeth using the dental dam and clamp. When placing the dam, I feel that I was able to choose an appropriate clamp and secure this with floss and place it onto the tooth. I initially tore the dam when practicing the isolation of 11 teeth, however upon repeating this process and trying again, I was able to isolate the teeth without any tears. I was able to invert the dam around the teeth, however I feel that this could have been done more thoroughly and specifically for the lingual aspect.

Assessor Feedback

Dam tension too tight causing gaps and small tears from flossing
