### Student Feedback

Used too much material when applying the clamp therefore causing tears. Also caused the loss of a hole.  
Care should be applied when stretching dam onto teeth. Make sure that clamp wings are cleared of dam.  
Inversion of the dental dam just involves pushing the dam into the gingival sulcus.  
Slightly overfilled sealant on marginal ridges.

### Assessor Feedback

Dental dam isolati 37-47 incomplete. Large tears and holes missed but due to time constraints have victor move on. Dental dam 9-10.15am.
