Student Feedback

This is for the isolation of the 37 to the 44. Most of the isolation was okay, was happy with the position of the frame specifically and felt it covered the oral cavity and not the nasal cavity. Had initial struggles with flossing, but eventually improved once I switched to the blue dental dam and realisation that you need to floss repeatedly. Main issues were with some tears in the dam that may have resulted in the dam getting caught in the wings and poor hole position. Also was difficult to invert the dam, but this improved a little after using the triplex to help

Assessor Feedback

Dam tension too tight causing gaps and small tears from flossing
Very enthusiastic to try different methods of dam placement. Great attitude towards learning

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	No	Yes	No
No large tears	No	Yes	Yes

Dental Dam Isolation (DDS) Score: 1.0 (Cutoff: 0.81)

Pass: True

Student Feedback

The benchtop fissure sealant went fairly reasonable, I feel I did a good job not using too much Conseal F and making sure I was just covering the fissures and not occlusal surfaces, the margins were smooth as well. Their were a few things that needed to be improved on in the small occlusal preparation. I feel like I wasn't careful enough with the high speed handpiece to find the location of the caries. This resulted in a cavitation that was too deep and too long bucco-lingually due the adjustments I had to make. My overall work with both handpieces was also somewhat sloppy, and as a result, the edges of my cavity were a little rough. This was improved on by learning to keep my bur moving to get a smoother finish, but still a little rough. I felt the restoration with the composite went about as expected, but I shouldn't have cured fissure sealant over resin, as the demonstrator couldn't check my work effectively. Finishing was going well, but unfortunately ran out of time to complete, with still some rough spots remaining.

Assessor Feedback

Keep high and slow speed burs moving to create smooth outline and internal surface
Try not to cover composite with sealant

Evaluation for SOP-DDS: DDS1 SmOcc Prep

Marking Checklist	Student	Educator	Critical
Selective caries removal demonstrated: pulpal	Yes	Yes	Yes
Selective caries removal demonstrated: peripheral surfaces	Yes	Yes	Yes
DEJ is caries free	Yes	Yes	Yes
Cavity outline reflects extent of caries	No	No	Yes
Cavity depth reflects extent of caries	No	No	Yes
Cavosurface margins supported?	Yes	Yes	Yes
Internal surfaces smooth	No	No	No
Adjacent teeth/surfaces: no iatrogenic damage	Yes	Yes	Yes

DDS1 SmOcc Prep Score: 0.69 (Cutoff: 0.86)

Pass: False

Evaluation for SOR-DDS: DDS1 SmOcc Resto

Marking Checklist	Student	Educator	Critical
Composite handling: Homogenous	Yes	Yes	Yes
Surface finish smooth	No	NA	No
Margins: No deficiency	Yes	NA	Yes
Margins: No excess	Yes	NA	No
Tooth morphology and contour resembles anatomy	NA	NA	No
Adjacent teeth/surfaces: No iatrogenic damage	NA	NA	Yes

DDS1 SmOcc Resto Score: 1.0 (Cutoff: 0.69)

Pass: True

Evaluation for FS-DDS: DDS1 FS

Marking Checklist	Student	Educator	Critical
Correct surface preparation prior to placement	Yes	Yes	NA
Neat placement in fissure system	Yes	Yes	NA

DDS1 FS Score: 0 (Cutoff: N/A)

Pass:
