Student Feedback

Need to work more on inverting the dam around the teeth by pushing the dam down into the sulcus more. Be careful of causing small tears when pulling the dam around the teeth and flossing it through.

Assessor Feedback

Lower anteriors everted, but corrected on instruction.

Good time management and made sure to cover opposing arch and tidy dam to frame at the end.

Excellent effort for your first session

Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	Yes	Yes	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	Yes	Yes	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	No	No	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 0.99 (Cutoff: 0.81)

Pass: True

Student Feedback

Small amount of fissure sealants at each time of application. Make sure to put it in the fissure system to prevent excess.

Assessor Feedback

Less material in fissure system

Student Feedback

I was able to find and remove the caries without drilling too deep and too wide. Good attempt on using the high speed handpiece today. However, I will need to work more on making sure that there is no unsupported enamel during cavity modification and smoothen the surface of the cavity with slow speed handpiece.

Im looking forward to attempt finishing and polishing my first restoration next session!

Assessor Feedback

Good judgement in detection of caries with high speed and removal of unsupported tooth structure before use of slow speed
Need to apply lighter pressure for slow speed
