Student Feedback

I found the dental dam challenging to complete at first, however with some guidance I was able to do a better job. Something that I struggled with was closing the gaps around the buccal and lingual aspects and securing the clamp. I also used the incorrect clamp at first, but I was missing it from the matrix kit, so perhaps after receiving the correct one it will secure better.

Assessor Feedback

Good effort. Dont forget the floss securing the clamp,winged or wingless.

Student Feedback

I enjoyed completing this simulation, it was challenging at first to locate the cavity, and something that Dr. Phu mentioned that helped me improve was to increase my confidence while drilling with the high speed, since I was too nervous to drill in the wrong location. With her guidance I was able to locate the cavity, and clean it out.

Assessor Feedback

Good conservative cavity prep. Dont be afraid to make mistakes. Now is the perfect time to make them and learn before you move on to real patients. Good job!
