**Student Feedback**

I found the dental dam activity challenging. I struggled to put the dam around the clamp, and this is something I definitely will need to practice on even at home. For Task 5, it did give me some trouble with aligning the holes to the correct teeth as I ended up losing one hole. I need to work on a few different things such as flossing between the teeth to ensure the rubber fits around the teeth nicely and work on placing the frame correctly.

**Assessor Feedback**

Advised to ask for help early if struggling with something- this will improve time management, advised to review over lectures and videos so that familiar with terminology eg inversion/ eversion/ names of instruments. Eg flat plastic vs gingival margin trimmer.

*assessor\_positioning\_MC1*

Yes

*assessor\_positioning\_MC2*

Yes

**Student Feedback**

The removal of the caries went well. It was noted to be at the DEJ at first but I was able to successfully remove it after. The buccal side was a bit rough but nothing of concern. Restoration to complete next class.

**Assessor Feedback**

Conservative prep, aim for a smoother cavosurface margin
