Student Feedback

I realized I needed to use smaller holes for the mandibular incisors for the dam and didn't have enough time to redo it and complete the third task.

Assessor Feedback

Good work for the first session. Good time management, final task not assessed but attempted.

Student Feedback

For cavity prep, the hole was too big because I started too lingually for the initial whole, and the cavity ended up being more on the buccal side. Had issues with finishing and polishing - the cusps were flattened during this process due to the burs not being parallel enough to the cusps.

Assessor Feedback

Neat placement of fissure sealant. Cavity prep slightly overextended. Be careful with shaping your restoration - make sure you dont cut away other structures of the tooth during the process.
