#### Student Feedback

Today I completed 3 rubber dam application tasks, and was formatively assessed on the final task. It was awkward attaching the rubber dam for the first time, but I felt myself building confidence and speed with each attempt. In my final attempt, I became frustrated when the clamps weren't fitting as I liked. I was also frustrated that I did not adjust dam hole sizes to fit the each tooth. I therefore developed tunnel vision, and only focused on the parts that were frustrating me. This lead me to forget some basics (i.e.wing beak exposure/oral cavity coverage). In the future, I hope to remind myself of the basics throughout the exercise.

#### Assessor Feedback

Well done today, Tahlia. You demonstrated good posture and ergonomics, time management, and were mindful of infection control practices.

# Evaluation for DDI-DDS: Dental Dam Isolation (DDS)

Marking Checklist	Student	Educator	Critical
Nasal airway open and oral cavity covered	No	No	Yes
Chosen clamp fits securely around tooth	Yes	Yes	No
Clamp correctly secured with floss, floss is secured and contained	Yes	Yes	Yes
Clamp handling: wings and beaks exposed, no floss caught in beaks	No	No	Yes
Accessory retention appropriately placed (if applicable)	Yes	Yes	Yes
Dam secured to frame, frame correctly oriented	Yes	Yes	Yes
Appropriate number of teeth isolated	Yes	Yes	Yes
Dam flossed interproximally, including distal to the clamp	Yes	Yes	No
Dam inverted around all teeth	Yes	Yes	No
No large tears	Yes	Yes	Yes

Dental Dam Isolation (DDS) Score: 0.73 (Cutoff: 0.81)

Pass: False

#### Student Feedback

The fissure sealing was very enjoyable and ran smoothly. The Small cavity prep on the other hand was quite challenging. In an effort to smoothen the margins, I would accidentally create the prep deeper and larger. This created rougher edges that meant I had to continue smoothening the margins. In the end, my prep-margins were too large. Next time I hope to be more conservative. I also struggled with the composite curing in ambient light. This meant that there was a rough finish in the end.

#### Assessor Feedback

Cavity very large and resulted in thin enamel buccal wall and very deep, very close to pulp

Restoration very over filled and bulbous but managed to self correct and restore well
