#### Student Feedback

Yeah good day in the office. Think my fissure seal on tooth 37 had a good amount of material and surface felt smooth with dental explorer. For 36, initial opening was good but had to expand to locate dye. Ended up cutting more tooth structure than planned. For the resto, followed the existing grooves to maintain anatomy but def overused the finishing diamond bur and damaged the lingual cusp on the distal side of 36. Overall though Im happy got a good feel for how not to use a diamond bur lol

#### Assessor Feedback

Need to work on infection control. Please stop touching your laptop and loupes with gloved hands. Cavity prep can be more conservative.
