Student Feedback

Try not to make cavity too big.

Make sure to put fissure sealant right up to edges/margin of tooth.

Do not put fissure sealant over resin composite restoration, only in fissures on/around the edges.

Try to recreate tooth anatomy accurately.

Next time, try more extensive finishing of restoration to modify shape and aesthetic.

Try to stay focused on my own work and not compare to others around me.

Assessor Feedback

Neat placement of fissure sealant. Dont be afraid to make mistakes. Now is the time to make them before you move onto real patients. Good awareness of unsupported enamel. Smooth restoration.
