

Grace Wu

Number of forms: 6

1.1 Obtain and interpret a prenatal, natal and neonatal history, medical history, dental history and social history and identify the chief complaint

1.2 Conduct a thorough and accurate clinical examination

1.3 Determine the appropriate radiographic study and obtain diagnostic radiographs with minimal radiation exposure to patient and personnel

1.4 Interpret findings from history, clinical exam and diagnostic tests, and arrive at a diagnosis

1.5 Develop a comprehensive, logically sequenced, individualized treatment plan based on the diagnosis

1.6 Recognize when consultation with other clinician(s) is indicated and provide a written referral(s) that includes appropriate diagnostic material

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

1.7 Recognize the significance of special health care needs in individual patients and formulate a treatment plan that utilizes the alternatives in the delivery of dental care that those conditions may require

1.8 Explain and discuss the findings, diagnosis and treatment options with the patient, parent and /or guardian including an explanation of a treatment plan that has been modified due to medical or physical limitations, behavioral, financial, or other unexpected factors

1.9 Discuss financial obligations and obtain informed consent from the legally responsible party

1.10 Establish and maintain accurate patient treatment records

2.1 Provide developmentally and age-appropriate education to patients, parents and caretakers concerning the etiology and scientific principals underlying the prevention of oral diseases including diet management, chemotherapeutics and other approaches

2.2 Implement individualized plans for health promotion and disease prevention by identifying factors that may impede behavioral change and compliance, and implement strategies to motivate patients, parents and caretakers to assume responsibility for their oral health

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

2.3 Evaluate the effectiveness of preventive programs and make adjustments when indicated

3.2 Describe to parents, in understandable terms, the various behavior guidance techniques and obtain informed consent

3.4 Utilize nitrous oxide inhalation appropriately and effectively

3.1 Perform a differential diagnosis of patient fear and anxiety and select the appropriate behavior guidance technique to alleviate pain and anxiety

3.3 Apply age-appropriate and culturally sensitive non-pharmacologic behavior guidance techniques effectively in an out-patient setting

3.5 Perform pre-operative workup and assessment including medical risk assessment prior to sedation and general anesthesia

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

5.3 Recognize when specialist periodontal care is indicated and make an appropriate referral

6.1 Understand the properties and indications for contemporary restorative and prosthetic techniques available for the restoration of primary, mixed and permanent dentition

6.2 Administer local anesthesia safely and effectively, and appropriately manage local and general complications

6.3 Utilize the various restorative and prosthetic techniques appropriately and effectively, and be able to analyze failures

6.4 Lead multi-disciplinary teams in providing comprehensive care for healthy patients as well as those who are medically, physically, mentally or socially compromised

7.1 Diagnose and manage pulpal disease in primary as well as immature and mature permanent teeth

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

7.2 Recognize when specialist endodontic care is indicated and make appropriate referral

8.1 Diagnose and manage the common bacterial, fungal and viral oral diseases in infants, children and adolescents

9.1 Participate in general anesthesia cases by completing: pre-operative workup and assessment, medical risk assessment, admitting procedures, and informed consent

9.2 Perform intra-operative management including completion of the dental procedures, post-operative care, discharge, follow up, and completion of medical records

9.3 Manage the oral care of patients who have been admitted to general, psychiatric or rehabilitation hospitals/facilities

10.1 Recognize normal growth and development of the craniofacial complex and diagnose abnormalities in the developing dentition utilizing clinical examination and other diagnostic tests.

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

10.2 Recognize the indications, contraindications and fundamental treatment modalities used in guidance of eruption and space supervision of the developing dentition.

10.3 Recognize when consultation with and/or timely referral to orthodontic or other specialist care is indicated in order to achieve optimal outcomes in the developing occlusion

10.4 Perform interceptive removable and/or fixed orthodontic procedures in the primary, mixed, and early permanent dentition to establish a stable, functional and esthetic occlusion

11.1 Perform extraction of uncomplicated primary and permanent teeth including fractured or residual root tips

11.2 Perform minor oral surgical procedures including excisional and incisional biopsy, soft tissue surgery and exposure of impacted teeth

11.3 Recognize and manage common intra-operative and post-operative surgical complications

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

11.4 Recognize when specialist oral surgical care is indicated and make appropriate referral

12.1 Appropriate professional attire and appearance

12.2 Punctual and prepared for clinic

12.3 Speaks respectfully to parents and patients

12.4 Self-evaluates clinical performance

12.5 Seeks appropriate faculty advice

12.6 Alters behaviour based on faculty advice

Competent to work semi-independently at Royal Children's Hospital

Final Grades

Describe the strongest aspects of the student’s performance, including examples of noteworthy incidents

Date	Staff	Comments
2025-11-06	Nicky Kilpatrick	Grace's confidence has grown this year and she has made great steps forward in her ability to communicate with patients and with her peers. She is able to create and communicate appropriate treatment plans and to implement them competently.
2025-11-06	Heshani Kellapatha	Improved restorative and extraction techniques Good treatment planning
2025-11-07	Wendy Cheney	Dr. Wu has continued to demonstrate improvement in all aspects of her clinical work. She often seeks, then carefully listens to advice. Her interactions with patients are noticeably more attentive and personal - and everyone benefits from this more compassionate approach. Her diagnosis and treatment planning skills are becoming more accurate and appropriate. Dr. Wu is to be commended for her tireless efforts to improve her clinical performance. Well done!
2025-11-08	Dharini Ravindra	Grace is always prepared for clinic and does try to change her behaviour based on faculty advice. It is important that she takes time to understand the advice given before doing this.
2025-11-10	Daniel Andreasen-Cocker	I was with Grace once this semester. It was obvious there had been a lot of improvement since last year. See daily comments
2025-11-10	Mihiri Silva	Grace has shown considerable growth in the last year and I congratulate her on all the hard work she has put in. She does still find some very complex situations challenging - these usually relate to multi-dimensional complex issues for patients, often exacerbated by social and health service related issues. While I sympathise with this context, it is the reality of clinical practice and something that Grace will have to continue to navigate in her professional career.

Describe any aspect of the student's performance where he/she needs to spend more time and effort. Include any examples of critical incidents

Date	Staff	Comments
2025-11-06	Nicky Kilpatrick	Nothing specific - just keep doing wha tyou are doing
2025-11-06	Heshani Kellapatha	Improve communication with parents during consenting process
2025-11-08	Dharini Ravindra	Grace would benefit from making sure her clinical decisions are always backed up by evidence base. She often struggles to determine whether teeth are restorable or not and which primary teeth need a pulpotomy. It would be good to cement these skills heading into 3rd year.
2025-11-10	Mihiri Silva	Grace has clearly applied her self to improve her ability to manage the complex cases at RCH. There have been a few cases of incorrect diagnoses in challenging situations so I think she still needs to continue to maintain this level of focus in the final part of her training.
