

Katelyn Symes

Number of forms: 6

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

1.1 Obtain and interpret a prenatal, natal and neonatal history, medical history, dental history and social history and identify the chief complaint

1.2 Conduct a thorough and accurate clinical examination

1.3 Determine the appropriate radiographic study and obtain diagnostic radiographs with minimal radiation exposure to patient and personnel

1.4 Interpret findings from history, clinical exam and diagnostic tests, and arrive at a diagnosis

1.5 Develop a comprehensive, logically sequenced, individualized treatment plan based on the diagnosis

1.6 Recognize when consultation with other clinician(s) is indicated and provide a written referral(s) that includes appropriate diagnostic material

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

1.7 Recognize the significance of special health care needs in individual patients and formulate a treatment plan that utilizes the alternatives in the delivery of dental care that those conditions may require

1.8 Explain and discuss the findings, diagnosis and treatment options with the patient, parent and /or guardian including an explanation of a treatment plan that has been modified due to medical or physical limitations, behavioral, financial, or other unexpected factors

1.9 Discuss financial obligations and obtain informed consent from the legally responsible party

1.10 Establish and maintain accurate patient treatment records

2.1 Provide developmentally and age-appropriate education to patients, parents and caretakers concerning the etiology and scientific principals underlying the prevention of oral diseases including diet management, chemotherapeutics and other approaches

2.2 Implement individualized plans for health promotion and disease prevention by identifying factors that may impede behavioral change and compliance, and implement strategies to motivate patients, parents and caretakers to assume responsibility for their oral health

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

2.3 Evaluate the effectiveness of preventive programs and make adjustments when indicated

3.1 Perform a differential diagnosis of patient fear and anxiety and select the appropriate behavior guidance technique to alleviate pain and anxiety

3.2 Describe to parents, in understandable terms, the various behavior guidance techniques and obtain informed consent

3.3 Apply age-appropriate and culturally sensitive non-pharmacologic behavior guidance techniques effectively in an out-patient setting

3.4 Utilize nitrous oxide inhalation appropriately and effectively

3.5 Perform pre-operative workup and assessment including medical risk assessment prior to sedation and general anesthesia

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

5.3 Recognize when specialist periodontal care is indicated and make an appropriate referral

6.1 Understand the properties and indications for contemporary restorative and prosthetic techniques available for the restoration of primary, mixed and permanent dentition

6.2 Administer local anesthesia safely and effectively, and appropriately manage local and general complications

6.3 Utilize the various restorative and prosthetic techniques appropriately and effectively, and be able to analyze failures

6.4 Lead multi-disciplinary teams in providing comprehensive care for healthy patients as well as those who are medically, physically, mentally or socially compromised

7.1 Diagnose and manage pulpal disease in primary as well as immature and mature permanent teeth

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

7.2 Recognize when specialist endodontic care is indicated and make appropriate referral

8.1 Diagnose and manage the common bacterial, fungal and viral oral diseases in infants, children and adolescents

9.1 Participate in general anesthesia cases by completing: pre-operative workup and assessment, medical risk assessment, admitting procedures, and informed consent

9.2 Perform intra-operative management including completion of the dental procedures, post-operative care, discharge, follow up, and completion of medical records

9.3 Manage the oral care of patients who have been admitted to general, psychiatric or rehabilitation hospitals/facilities

10.1 Recognize normal growth and development of the craniofacial complex and diagnose abnormalities in the developing dentition utilizing clinical examination and other diagnostic tests.

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

10.2 Recognize the indications, contraindications and fundamental treatment modalities used in guidance of eruption and space supervision of the developing dentition.

10.3 Recognize when consultation with and/or timely referral to orthodontic or other specialist care is indicated in order to achieve optimal outcomes in the developing occlusion

10.4 Perform interceptive removable and/or fixed orthodontic procedures in the primary, mixed, and early permanent dentition to establish a stable, functional and esthetic occlusion

11.1 Perform extraction of uncomplicated primary and permanent teeth including fractured or residual root tips

11.2 Perform minor oral surgical procedures including excisional and incisional biopsy, soft tissue surgery and exposure of impacted teeth

11.3 Recognize and manage common intra-operative and post-operative surgical complications

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

11.4 Recognize when specialist oral surgical care is indicated and make appropriate referral

12.1 Appropriate professional attire and appearance

12.2 Punctual and prepared for clinic

12.3 Speaks respectfully to parents and patients

12.4 Self-evaluates clinical performance

12.5 Seeks appropriate faculty advice

12.6 Alters behaviour based on faculty advice

Competent to work semi-independently at Royal Children's Hospital

Final Grades

Describe the strongest aspects of the student's performance, including examples of noteworthy incidents

Date	Staff	Comments
2025-11-06	Nicky Kilpatrick	Kaitlyn is a very competent clinician, she is organised and thorough in her approach including to record keeping and communication.
2025-11-06	Heshani Kellapatha	Good restorative and extractions techniques Good treatment planning
2025-11-07	Wendy Cheney	Dr. Symes has continued to strive towards excellence in her clinical work - and the progress she has made in all aspects is noticeable. She is awarm and compassionate practitioner - which is greatly appreciated by her patients and their families. Her technical skills are simply outstanding! She often reflects on her performance - a skill that will serve her well in the years ahead. Overall an impressive second year - congratulations!
2025-11-08	Dharini Ravindra	Katelyn has improved a lot this semester and is now very confident with her crown and pulpotomy preps. She is always eager to learn techniques and procedures and has started to focus more on integrating evidence based paediatric dentistry into her treatment planning.
2025-11-10	Daniel Andreasen-Cocker	See daily comments
2025-11-10	Mihiri Silva	Having supervised her both in the clinic at RCH as well as on call, I continue to be impressed by Katelyn's progress and commitment to her learning. She has been very enthusiastic and proactive in seeking advice. I feel that there are aspects of her training that she may find challenging or different to her expectations, but I think this year she has been able to adopt a very open minded attitude and really embraced the opportunity to learn. Its important that Katelyn continues to develop her ideas through robust discussions.

Describe any aspect of the student's performance where he/she needs to spend more time and effort. Include any examples of critical incidents

Date	Staff	Comments
2025-11-06	Nicky Kilpatrick	There is still some work to be done for Kaitlyn in terms of being able to apply what she/is 'known' to each individual patient ie to be being agile in her approach and planning. There are in effect no 'right' and 'wrongs' clinical practice and even between clinicians (consultants) there is a diverse range of approaches. In your final year try to focus on working out what your approach to patient care is going to be and why.
2025-11-06	Heshani Kellapatha	-
2025-11-08	Dharini Ravindra	Katelyn and I have discussed that over the next year, it would be good to see her work on her speed with simple restorative GA cases.
