

# Simone Cromarty

Number of forms: 6

1.1 Obtain and interpret a prenatal, natal and neonatal history, medical history, dental history and social history and identify the chief complaint

1.2 Conduct a thorough and accurate clinical examination

1.3 Determine the appropriate radiographic study and obtain diagnostic radiographs with minimal radiation exposure to patient and personnel

1.4 Interpret findings from history, clinical exam and diagnostic tests, and arrive at a diagnosis

1.5 Develop a comprehensive, logically sequenced, individualized treatment plan based on the diagnosis

1.6 Recognize when consultation with other clinician(s) is indicated and provide a written referral(s) that includes appropriate diagnostic material

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

1.7 Recognize the significance of special health care needs in individual patients and formulate a treatment plan that utilizes the alternatives in the delivery of dental care that those conditions may require

1.8 Explain and discuss the findings, diagnosis and treatment options with the patient, parent and /or guardian including an explanation of a treatment plan that has been modified due to medical or physical limitations, behavioral, financial, or other unexpected factors

1.9 Discuss financial obligations and obtain informed consent from the legally responsible party

1.10 Establish and maintain accurate patient treatment records

2.1 Provide developmentally and age-appropriate education to patients, parents and caretakers concerning the etiology and scientific principals underlying the prevention of oral diseases including diet management, chemotherapeutics and other approaches

2.2 Implement individualized plans for health promotion and disease prevention by identifying factors that may impede behavioral change and compliance, and implement strategies to motivate patients, parents and caretakers to assume responsibility for their oral health

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

2.3 Evaluate the effectiveness of preventive programs and make adjustments when indicated

3.2 Describe to parents, in understandable terms, the various behavior guidance techniques and obtain informed consent

3.4 Utilize nitrous oxide inhalation appropriately and effectively

3.1 Perform a differential diagnosis of patient fear and anxiety and select the appropriate behavior guidance technique to alleviate pain and anxiety

3.3 Apply age-appropriate and culturally sensitive non-pharmacologic behavior guidance techniques effectively in an out-patient setting

3.5 Perform pre-operative workup and assessment including medical risk assessment prior to sedation and general anesthesia

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

5.3 Recognize when specialist periodontal care is indicated and make an appropriate referral

6.1 Understand the properties and indications for contemporary restorative and prosthetic techniques available for the restoration of primary, mixed and permanent dentition

6.2 Administer local anesthesia safely and effectively, and appropriately manage local and general complications

6.3 Utilize the various restorative and prosthetic techniques appropriately and effectively, and be able to analyze failures

6.4 Lead multi-disciplinary teams in providing comprehensive care for healthy patients as well as those who are medically, physically, mentally or socially compromised

7.1 Diagnose and manage pulpal disease in primary as well as immature and mature permanent teeth

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

7.2 Recognize when specialist endodontic care is indicated and make appropriate referral

8.1 Diagnose and manage the common bacterial, fungal and viral oral diseases in infants, children and adolescents

9.1 Participate in general anesthesia cases by completing: pre-operative workup and assessment, medical risk assessment, admitting procedures, and informed consent

9.2 Perform intra-operative management including completion of the dental procedures, post-operative care, discharge, follow up, and completion of medical records

9.3 Manage the oral care of patients who have been admitted to general, psychiatric or rehabilitation hospitals/facilities

10.1 Recognize normal growth and development of the craniofacial complex and diagnose abnormalities in the developing dentition utilizing clinical examination and other diagnostic tests.

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

10.2 Recognize the indications, contraindications and fundamental treatment modalities used in guidance of eruption and space supervision of the developing dentition.

10.3 Recognize when consultation with and/or timely referral to orthodontic or other specialist care is indicated in order to achieve optimal outcomes in the developing occlusion

10.4 Perform interceptive removable and/or fixed orthodontic procedures in the primary, mixed, and early permanent dentition to establish a stable, functional and esthetic occlusion

11.1 Perform extraction of uncomplicated primary and permanent teeth including fractured or residual root tips

11.2 Perform minor oral surgical procedures including excisional and incisional biopsy, soft tissue surgery and exposure of impacted teeth

11.3 Recognize and manage common intra-operative and post-operative surgical complications

- Completed with substantial assistance
- Completed with minimal assistance
- Completed independently (competent)
- No basis for evaluation

12.1 Appropriate professional attire and appearance

12.2 Punctual and prepared for clinic

12.3 Speaks respectfully to parents and patients

12.4 Self-evaluates clinical performance

12.5 Seeks appropriate faculty advice

12.6 Alters behaviour based on faculty advice

Competent to work semi-independently at Royal Children's Hospital

Final Grades

Describe the strongest aspects of the student’s performance, including examples of noteworthy incidents

| 2025-11-06 | Nicky Kilpatrick        | Simone brings good experience to her work at RCH. She is reflective and self directed. I have not supervised her on a general clinic yet.                                                                                                                                                                                                                                                                                                   |
| 2025-11-06 | Heshani Kellapatha      | Good treatment planning and clinical sills Efficient                                                                                                                                                                                                                                                                                                                                                                                        |
| 2025-11-07 | Steph Shields           | Simone's clinical experience is evident as she responds appropriately to challenging scenarios with patients and their families. She requires very minimal feedback for her treatment plans and has improved her presenting to be more systematic                                                                                                                                                                                           |
| 2025-11-07 | Wendy Cheney            | Dr. Cromarty entered the program as an experienced clinician - and it shows. Her patient management skills are already well-developed. She has a wonderful calming presence that her patients and their families greatly appreciate. Dr. Cromarty's clinical instinct for diagnosis and treatment planning is sophisticated for a student at this stage of training. Her technical skills are excellent. Overall, an impressive first year! |
| 2025-11-08 | Dharini Ravindra        | Simone is always well prepared and has used her first year in GA well to try out different techniques and settled on that which she finds most effective. She is always keen to learn and understand procedures and the evidence base behind them.                                                                                                                                                                                          |
| 2025-11-10 | Daniel Andreasen-Cocker | See daily comment                                                                                                                                                                                                                                                                                                                                                                                                                           |

*Describe any aspect of the student's performance where he/she needs to spend more time and effort. Include any examples of critical incidents*

| Date       | Staff              | Comments                                                                                                                                                                                             |
|------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025-11-06 | Nicky Kilpatrick   | Nothing springs to mind - just keep doing what you are doing                                                                                                                                         |
| 2025-11-06 | Heshani Kellapatha | -                                                                                                                                                                                                    |
| 2025-11-08 | Dharini Ravindra   | Simone had an excellent odontome case this year which went very well - it would be good to use the opportunity whilst training to line up some more surgical cases to do in the next couple of years |
